

An Innovative Module for big savings on Ink and Toner

PrintBOS InkTon (Preton™ inside) is a new and innovative PrintBOS module which assures you of immediate and measurable savings on your Toner and Ink costs. Working seamlessly and using advanced algorithms (Patent pending), PrintBOS InkTon saves money from the first minute it's installed. PrintBOS Inkton provides companies with full transparency, measurement and management of the Printed document activities within their organisations.

PrintBOS InkTon's benefits are:

- *Optimising printing consumables used in the printing process, thus saving the enterprise's printing consumables cost by up to 50%, without degrading print quality.*
- *Providing full transparency and measurement of all the printing activities.*
- *Enabling organisations to minimize unnecessary printing tasks or transform them into paperless workflow.*
- *Allowing the enterprise to operate in a more environmentally responsible manner whilst simultaneously reducing overall printing costs.*

How does it work?

Optimising printing consumables:

PrintBOS InkTon uses a combination of algorithms which analyse and optimise every print job sent to any printer in the organisation.

PrintBOS InkTon instructs the printer to apply the necessary amount of toner or ink for the job. PretonSaver™'s activities are instantaneous and seamless to the user and there is no discernable degradation in the quality of the final product.

Providing transparency of all printing activities:

PrintBOS InkTon enables companies to monitor all of their printing and output activities. The reports generated by PrintBOS InkTon can be used to help develop an improved document output management strategy.

PrintBOS Inkton Features:

- *Optimises the usage of toner/ink*
- *Reporting tool that generates printing activity and cost reports per user, department, printer and client.*
- *Seamlessly integrates into all Windows environments*
- *Compatible with all major printer vendors*
- *Does not require print server architecture*
- *Supports local and network printers*
- *Supports Inkjet and LaserJet Printers*
