

How to upgrade your **JD Edwards EnterpriseOne** with **PrintBOS**?

PrintBOS is an Innovative enterprise output solution for design, management and distribution of data.

PrintBOS integrates easily with JD Edwards EnterpriseOne, and customers use it for a true variety of business applications and workflows:

- Purchase orders
- Invoices
- Inventory list forms
- Dynamic Management reports
- Barcode & labeling applications
- Faxes
- Check design and printing
- Mission critical document printing

PrintBOS transparently intercepts these output jobs and applies the correct graphic formatting to create the customer's preferred output. Time and labor-saving, **PrintBOS** allows employees to focus on more added-value tasks than print, fax, mail or other output jobs.

PrintBOS will help simplifying:

- Financial Management
- Supply Chain Management
- Customer Relationship Management
- Suppliers relations
- Printing costs reduction

And so much more...

PrintBOS is the modern, effective and cost-savings way to manage Print and output Jobs
